RE: 1980 2.5 Acre Bore Hole
Amendment to the Pandora Mine
ACT/037/012
San Juan County, Utah

Dear Mr. Blubaugh:

This is the second letter in the continuing series of the Division's review for Atlas Minerals' mine plans. On January 2, 1981, Jim Smith of the Division requested an updated map and plan of the surface facilities as well as a 1980 annual report. Neither was received. A request is now made for a current surface facility map for the operation including; topographic features, drainage patterns, access roads and all surface disturbances such as bore hole locations, buildings, storage areas, etc., (Rules M-8, M-6). It would be convenient to have buildings and areas labeled as to their function.

Additionally, I would propose to increase the amount of surety used in the contract form to \$21,571 as outlined on the enclosed sheet. This is, of course, subject to revision and dependent upon whether a dollar amount is even incorporated into the contract.

The Division will await a response from Atlas regarding the matter and hopes to locate a copy of the acceptable contract form. If any questions arise, please contact me.

Sincerely,

THOMAS N. TETTING
ENGINEERING GEOLOGIST
